SUMMARY

With 2 years of experience in the corporate environment as a ReactJS Developer, I have honed my technical proficiency in building complex websites and web-based applications from the ground up. My expertise extends to developing highly interactive and performance-optimized web applications by adeptly utilizing the MERN (MongoDB, Express.js, React, Node.js) tech stacks. I am skilled in leveraging technologies such as JavaScript (ES6), HTML5, CSS3, JSON, and frameworks/libraries including ReactJS, Tailwind CSS, Material UI.

SKILLS SUMMARY

- **Frontend Technologies**: HTML/HTML5, CSS/CSS3, JavaScript Frameworks/Libraries (ReactJS ,react native, next, Typescript,), UI Frameworks (Bootstrap, Tailwind CSS, Material UI) CSS Processors(Sass/Scss, Less)
- **Backend Technologies**: Node.js, Express.js, MongoDB,
- **Additional Skills**: Version Control: GitHub, Project Management & Collaboration Tools: Jira, Swagger, Design & Prototyping Tools: Photoshop, Adobe XD, Figma, API Integrations

WORK EXPERIENCE

- **Parsh technologies LLP**   Remote, Gujarat, India
  React Developer   *Jan 2024 – Sep 2024*
  - **Mobile Application:** developed HomeTeam project, a gaming platform similar to Dream11, for both Android and iOS devices using React Native. The platform incorporates parent and child user roles, where child users must be verified by the parent before gaining access. Once logged in, users can view upcoming events, track their targets, and schedule notifications. The UI is built using React Native for a seamless cross-platform experience, with REST API integration for backend communication, and global state is managed efficiently using Redux Toolkit.
  - In response to client requests, I improved the HomeTeam dashboard by reorganizing the layout for better event, target, and notification visibility. I implemented additional APIs to fetch more detailed data and introduced real-time updates. I also refined the design for improved responsiveness and user experience, meeting client expectations effectively.

- **AntinoLabs**   Gurugram, India
  React Developer   *Feb 2023 – Nov 2024*
  - **Dashboard**: I developed the entire dashboard, including the UI login flow, and implemented four modules to display user information. Global state management was handled using Redux Toolkit, with REST API integration for data handling. I used Material UI's DataGrid to create tables and integrated Chart.js for displaying graphs and line charts.
  - **Ev charging web app :** I developed a platform EV charging web app using React.js, ensuring a responsive design for various screen sizes. For global state management, I am utilizing Redux Toolkit. The layout is carefully crafted for optimal user experience on multiple devices. Styling is handled using a combination of Tailwind CSS and Material UI to maintain a clean, modern look. Additionally, I am integrating REST APIs to facilitate seamless communication between the frontend and backend systems.

- **Kiswok Industries Pvt Ltd**   Howrah, India
  Software Engineer   *Nov 2021 – March 2022*
  - **I**: Experience in designing/developing React applications and Experience with the coordination of offshore development projects.
  - **II**: Implementation of HTML, CSS & JavaScript in React Projects.

EDUCATION

- **Brainware University**   Barasat, West Bengal, India
  B.Tech in Computer Science & Engineering   *July 2020 - June 2023*

- **Nibedita Institute of Technology**   Murshidabad, West Bengal, India
  Diploma in Computer Science & Technology   *July 2017 - June 2020*
